

How to Connect to Optimumwifi-Emergency

To connect to the **optimumwifi-emergency** Wi-Fi there is no passcode that needs to be entered.

However, you do need to accept the terms and agreement for the Wi-Fi and it will only allow you to use it for one hour. When the hour is up you will be disconnected and allowed to connect again for another hour.

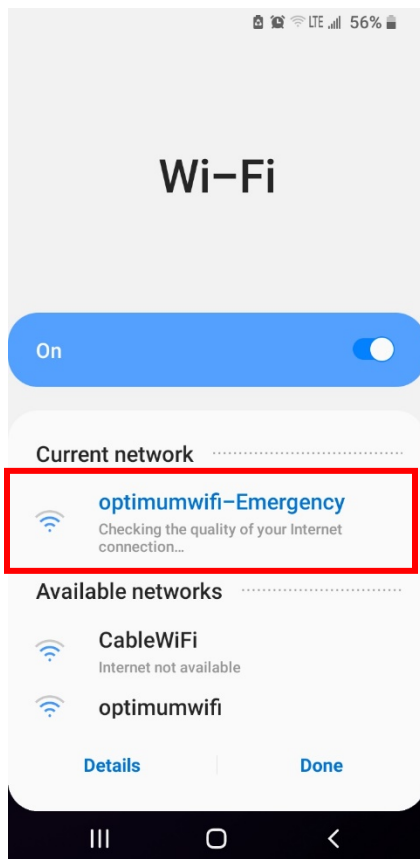

If you are not prompted for the agreement to connect to the Wi-Fi you will need to clear your browser cookies.

Here is a quick step by step guide on how to do it on an Android device.

Please note that this may look different for apple and other mobile devices. But, the procedure is more or less the same. Also optimum service may not be available in certain areas. Speak with your local optimum service provider for more information.

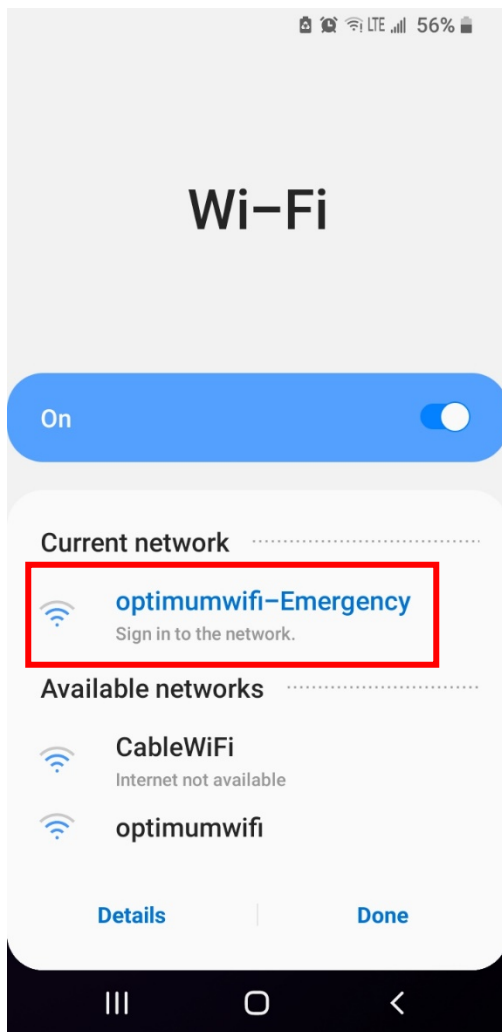

Step 1: Select the Optimumwifi-Emergency Wi-Fi to connect.

Go to your device settings and navigate to Wi-Fi settings, there you will find the “**optimumwifi-emergency**” available to connect to. Select the Wi-Fi, by clicking on it.

How to Connect to Optimumwifi-Emergency

Step 2: You will be either prompted to Sign-in to the Wi-Fi by your device or you will see a new window open on your browser the agreement page. In my case, I was prompted to sign-in to the Wi-Fi. Click on the Wi-Fi again to sign-in.
